1. Best Kept Secret of Composting

1. Composting makes the world a better place

1. Sequestering Carbon from the atmosphere to mitigate climate change
2. Improving Soil

Best Kept Secrets of Composting

2. Compost is Valuable

◇ So why do we give it away?

Best Kept Secrets of Composting

- ◆ Composting is easy
 - ◆ Organic material has been decomposing since the dawn of life.
 - ◆ We can make it as easy or as complicated as we want it to be.
 - ◆ Remember: Browns, Greens, Water, Air!

Best Kept Secrets of Composting

- ◆ Organics are a resource, not a waste

Let's start looking at organics as a resource for the soil and the planet instead of a waste product to deal with!

Soil Health = Human Health

- ◆ As stewards of this resource we can all take the small step with a big impact by Composting our organic waste and create a better planet.
