Take-Home Volunteering for Office Waste Diversion Programs

Nathan Bruce works alongside the Solid Waste Management division at Stantec Consulting Ltd., and assists in a program that is run by 15 volunteers who divert organic waste for 120 employees. The team diverts 18 kg/week, and composts materials at home. Wastes are processed primarily in outdoor boxes and tumblers, with some indoor vermicomposting and bokashi bins. Mass is tracked and shared in periodic updates to staff. Material research is conducted and shared through email updates to staff.
