# Lightning Talks: *Local Waste Innovators*

## *Stephen Foley*

*University of Saskatchewan:  
Department of Chemistry –  
Assistant Professor of Chemistry*

## **Recovering Elements: Extracting Gold from Electronic Waste**

*Professor Stephen Foley and his associates from the Department of Chemistry at the University of Saskatchewan have found a sustainable technique to recover gold from e-waste in a cheap and effective manner. Gold is the least reactive chemical element making it difficult to dissolve, but with their findings it could change the gold industry.*
